WITH YOU EVERY STEP OF THE WAY

Key Principles for Staying Safe When Traveling

Be situationally aware.

Know what is happening around you, know what is and isn't normal and if you do not feel comfortable in the area – get away.

Be confident and assured.

People that look confident are less likely to be hassled and are less likely to be the victims of crime.

Adopt a low profile.

Don't stand out with flashy jewelry or clothing and office materials like laptops or smartphones .

Don't be predictable.

Avoid patterns and go different routes, using different methods of travel at different times throughout your trip.

Communicate.

Maintain a way to speak to colleagues, friends, call for help, ask for assistance.

Have an effective response, in case something happens.

Be prepared to know where you would go, who you would call and what are your emergency contacts.

Situational Awareness: “See Something, Say Something”

A key aspect of being prepared to respond to an incident from a personal perspective is situational awareness:

- Situational Awareness is a natural state that allows a person to identify a change in environment.
- Pay attention to surroundings and what is happening around you.
- Use all of the senses in relation to the environment – What can you see? What noises can you hear? What can you smell? Is anything different?
- Being aware is not being paranoid – “See something, say something!”

AIG Travel, Inc., a member of American International Group, Inc., is a worldwide leader in travel insurance solutions and assistance.
